TECHNICAL SKILLS

Programming Languages:

Python, JavaScript, C++

Backend Development:

Django, Django REST Framework, FastAPI, SQLAlchemy, Django ORM,

Frontend Development:

React.js, Next.js, Tailwind CSS, MUI, Bootstrap, HTML5, CSS3

Databases:

MySQL, SQLite, PostgreSQL

Authentication & APIs

JWT Authentication, Social Authentication, OTP based Authentication, Authorization, REST APIs

Payment Integration

JazzCash

Tools:

Git, GitHub, Postman, GitHub Copilot, Cursor AI

Deployment:

PythonAnywhere, Railway, Vercel, Netlify,

Other Skills:

Object Oriented Programming, Data Structures & Algorithms, Problem Solving, Team Collaboration,

EDUCATION

BS in Computer Science

University of Baltistan
Mar 2022 - Dec 2025

PROFESSIONAL SUMMARY

Computer Science graduate with practical experience building web applications using Python, Django, Django REST Framework, FastAPI, Next.js, and React. I've worked on production projects, REST APIs, database-driven applications, and responsive websites. I have strong problem-solving skills and a practical approach to building reliable web solutions.

WORK EXPERIENCE

Full Stack Developer | 4xCode Software House

- Completed a Full Stack Development Internship and continue to contribute to software development projects at the company.
- Develop and maintain full-stack web applications using Django and Next.js.
- Collaborate with designers and developers to deliver scalable, production ready solutions for UK-based clients.
- Participate in feature development, API integration, debugging, code reviews, and ongoing website maintenance.

PROJECTS

Sulli Shopping Centre (FYP)

Fullstack Developer | Django Full Stack Developer

- Developed a full-stack e-commerce platform using Django.
- Implemented authentication system with OTP.
- Developed product variants based on sizes, and colors.
- Implemented product filtrations based on categories, genders and prices
- Designed and implemented order management system handling dynamic pricing and location-based delivery charges
- System calculates delivery charges based on location and number of items and adds to total price.
- Implemented advance online payment system where admin sets percentage for different locations.
- Integrated JazzCash Payment Method for online payments.
- Added confirmation email system after order completion.
- Developed product review and rating system with comments and star ratings.
- Created role-based dashboard so employees can access only allowed features.
- Allowed super admin to assign and remove permissions for employee users.
- Deployed project on PythonAnywhere.

[Live Demo](#)

Vogue Fix My Motor | Full Stack Developer

- Built responsive Next.js applications from Figma designs.
- Integrated dynamic content using JSON files and REST APIs.
- Built the Django REST API for the blog management system.
- Developed reusable and responsive components for better performance
- Developed 90+ pages using reusable components.
- Successfully delivered a production-ready website for a UK automotive business.
